

## **LOG OF CLOSED MEETING**

**SUBJECT:** Peroxisome Proliferators/Phthalates

**DATE:** September 11-12, 2002

**TIME:** 9:00 a.m. to 5:30 p.m. September 11 and 8:30 a.m. to 1:00 p.m. September 12

**PLACE:** International Life Sciences Institute, One Thomas Circle NW, Washington, DC  
**SOURCE:** Michael A. Babich, HS

### **ENTRY**

**COMMISSION REPRESENTATIVE:** Michael A. Babich, HS

**NON-COMMISSION REPRESENTATIVES:** Members of the PPAR (peroxisome proliferators) and Human Relevance Workgroups and ILSI staff.

### **Summary:**

This is one of a series of workgroup meetings on peroxisome proliferators organized by the International Life Sciences Institute (ILSI) for the U.S. Environmental Protection Agency (EPA). Participants include scientists from federal agencies, industry, and academia. The purpose of the workgroup is to review the state of the science on the human relevance of animal tumors induced by peroxisome proliferators, such as phthalate esters. The purpose of this meeting was to complete work on the PPAR Workgroup report, including a discussion of the mode of action of peroxisome proliferators. The Human Relevance Workgroup is developing generic criteria for assessing human relevance.

The meeting was closed to the public because of "extraordinary circumstances."
